2024 - Sunnit

SUNNIT

# WELCOME TO OUR COMPANY

**SunnitAI** represents a pioneering initiative by Sunnit, aimed at transforming enterprise knowledge management. This artificial intelligence-driven solution integrates seamlessly with your existing knowledge management systems (KMS) and document management systems; alternatively, it can implement a comprehensive solution, should your organization benefit from additional capabilities.

# OUR DISTINCTIVE ADVANTAGES

Our **vision** is to integrate expertise, experience, and an international perspective to provide exceptional technological solutions. At its core, **SunnitAI** is committed to transforming your organization's intellectual assets and data into a resource that is not only accessible but also actionable.

**SunnitAI** integrates seamlessly with your existing document management systems, email systems, shared folders, data warehouses, and data lakes, thereby creating a cohesive and intelligent knowledge ecosystem. This empowers your organization to leverage comprehensive insights and drive informed decision-making, ultimately maximizing the potential of your data and knowledge resources.

# EMBRACING THE FUTURE OF TECHNOLOGY

## INTELLIGENT DOCUMENT ANALYSIS

Leveraging advanced AI algorithms to understand context, extract key information, and automatically categorize documents, enhancing data management and accessibility.

## DYNAMIC KNOWLEDGE MAPPING

Creating interconnected networks of information that uncover hidden relationships and insights within your organization's data, enabling a deeper understanding of your operations.

## **NATURAL LANGUAGE QUERYING**

SunnitAI allows to use everyday language to receive accurate, contextualized answers.

## **CONTINUOUS LEARNING**

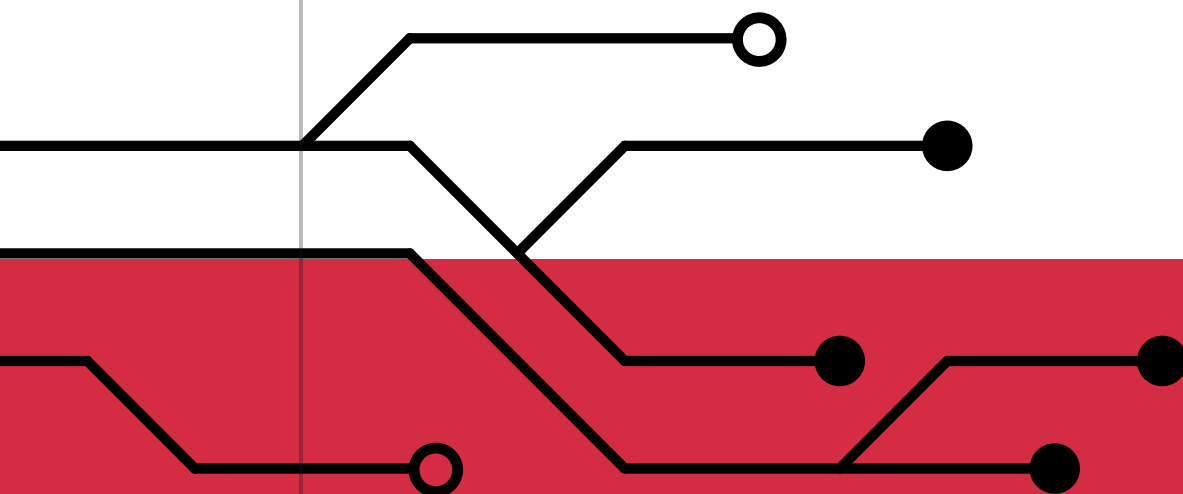

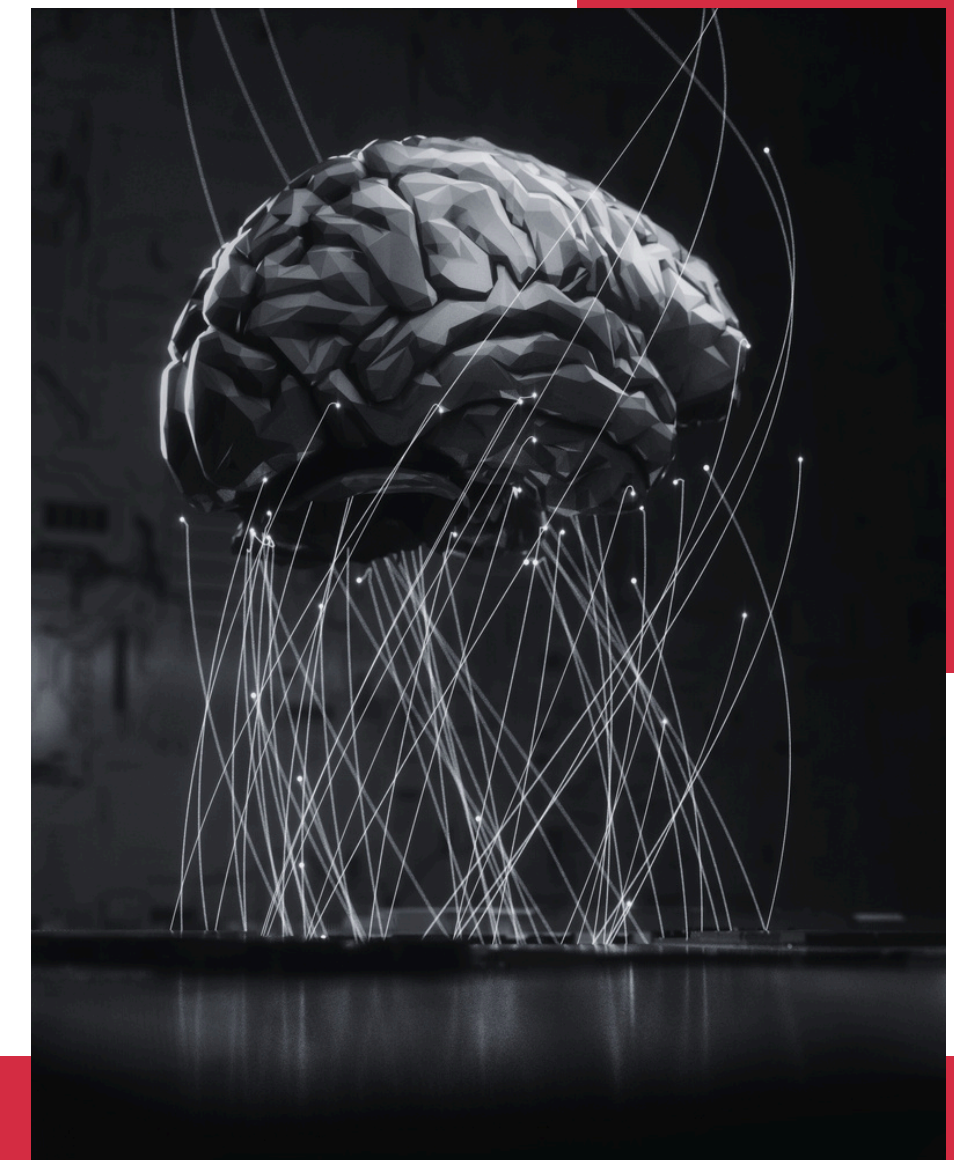

Evolves with your organization, constantly improving the understanding and organization of your business knowledge.

## **INTEGRATION WITH LEGACY SYSTEMS**

Old archives and databases brings to new life making their content searchable and relevant.

## **INCREASE KNOWLEDGE**

SunnitAI can extract the best practices to increase the user knowledge and give an expert like support

## SECURE ACCESS CONTROL

Ensuring that sensitive information remains protected and accessible only to authorized personnel, while promoting secure knowledge sharing where appropriate.

## ADVANCED DOCUMENT COMPARISON

Going beyond simple text comparison by analyzing documents with expert precision, identifying key differences, extracting vital entities, and building knowledge graphs for deeper insights.

## SAAS

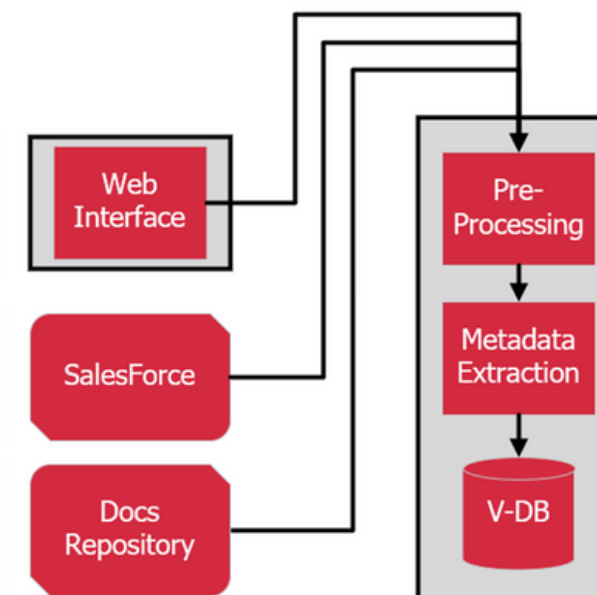

**SunnitAI** is proposed using the SaaS paradigm, that decouple the software in its operational dimension from the installation component.

Enterprise do not have to worry about installations, updates or maintenance, since everything is managed by the service provider.

Furthermore, it facilitates collaboration and access from any location, improving productivity and business flexibility.

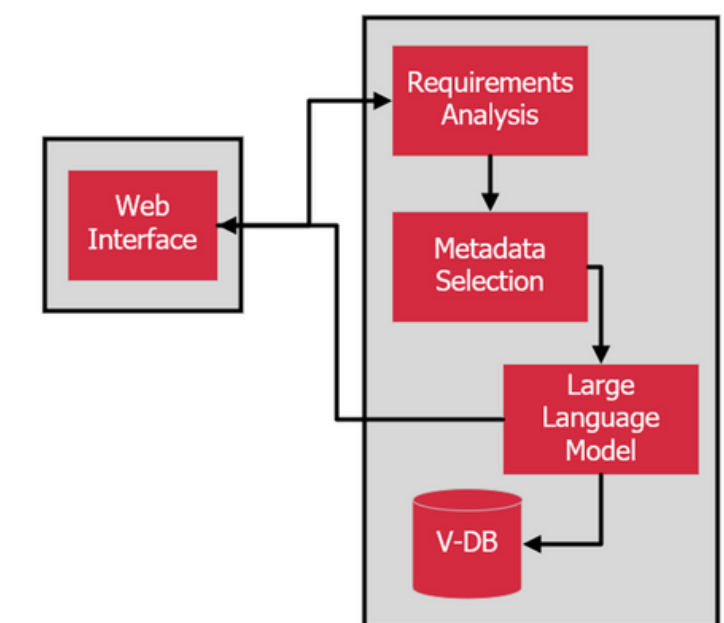

## PREPARATION

The Knowledge base can be prepared elaborating informations coming from a lot of different fonts: Docs Repository, Ticket Manager (SalesForce), Best Practices provided by Users

## CONSULTATION

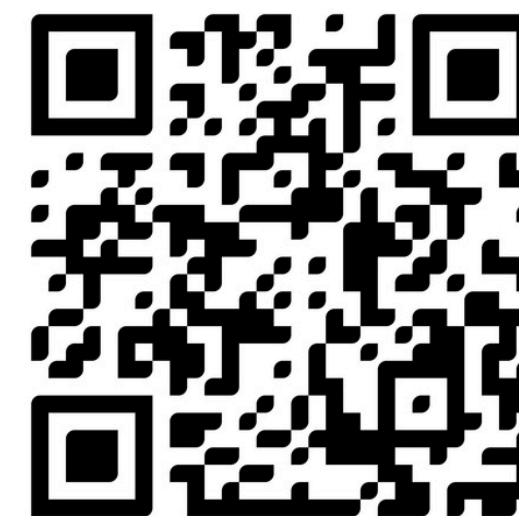

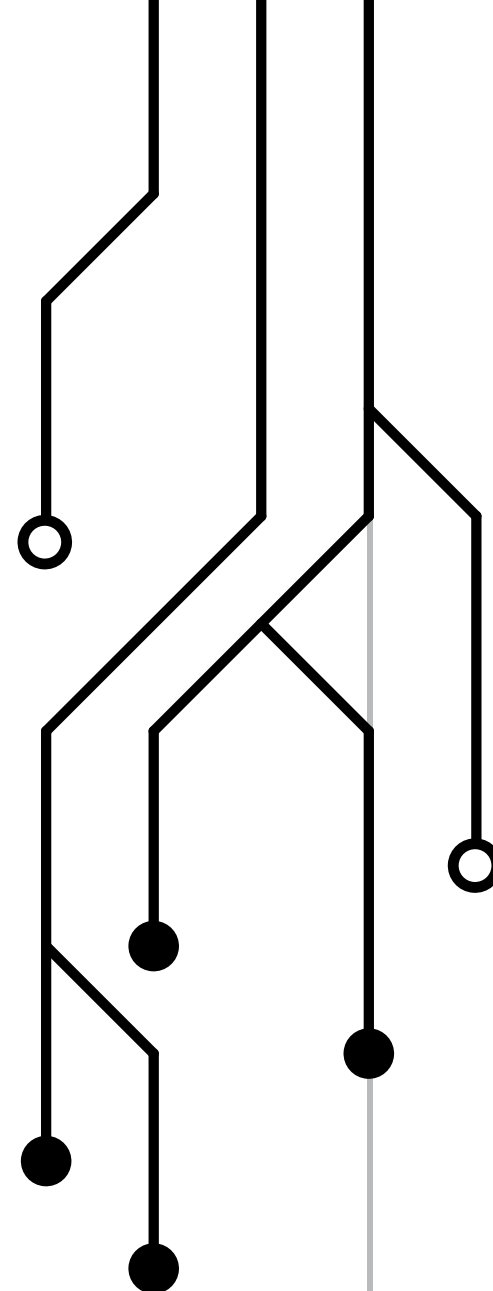

The Knowledge Base can be Consulted by Users using Natural Language, having back expert-like answer to the requested support. The LLM process allows to have back a clear and efficient interventions.
